WORK EXPERIENCE

JavaScript Developer FIRST

09/2025 - Present

Sofia, Bulgaria

B2B Product company providing software products for iGaming and online-sports platforms worldwide

Main Responsibilities

- **Implement pixel-perfect sportsbook UI from Figma designs**, translating complete mobile and desktop layouts into responsive, production-ready interfaces using **React**, **TypeScript**, and **LESS CSS**, ensuring design accuracy and cross-browser compatibility.
- **Develop and deliver new features and products end-to-end**, building frontend applications with **React** and creating supporting backend services with **NestJS** and **Node.js** for seamless integration into the main platform.
- **Manage code lifecycle across environments**, creating and maintaining repositories in **Bitbucket**, coordinating deployments to development and production, and collaborating closely with QA through **Jira** to ensure high-quality releases.
- **Resolved frontend and backend issues reported by QA**, debugging and optimizing existing features to improve performance, maintainability, and overall system stability.
- **Contributed to UI architecture and styling structure**, maintaining scalable LESS/CSS codebases and ensuring consistency across multiple sportsbook projects and client implementations.
- **Delivered high-quality features under tight deadlines**, effectively prioritizing tasks and maintaining attention to detail while working in fast-paced release cycles and production environments.
